Outer Chamber 40 x 45 mm, Inner chamber 20 x 35 mm, Length 160 mm

National Day Price USD 520.-

SHÔSUGIBAN PIPE

The Chamber and stem made from Briar. As for the finish I have chosen a technique used in Japan to seal wood by burning the surface, which is called "Shôsugiban" or "Yakisugi". After burning the surface of the Briar Head it was brushed with a brass brush and some thin layers of transparent "Sukrome Urushi" were applied to seal the surface. Some manipulated cracks were mended with brass butterfly inlays to give it an archaic touch. The concept of this pipe is, that it is convertible constructed from 3 parts Chamber, Stem and Mouth Piece.

Outer Chamber 40 x 45 mm, Inner chamber 20 x 35 mm, Length 160 mm

National Day Price USD 580.-

SHIBUI PIPE (Negoro Nuri)
