BERYLLIUM COPPER - THE NEW GOLD?

This is a Beryllium Copper  
#9 F Nib. It writes very  
smooth, nice flow  
I am very happy  
that this project ever  
existed

Regards  
Martin

My personal Pen with a #9 Nib

The image shows four gold fountain pen nibs. Three are arranged in a row on a white textured cloth, and one is partially visible in a clear plastic bag in the upper left. The nibs are labeled with their respective models: JOWO#6, Bock#8, and BeCu#9. The BeCu#9 nib is the largest and most prominent, showing a classic split-tube design with a small hole on the upper surface. The Bock#8 and JOWO#6 nibs are smaller and have a more modern, angular design. The fourth nib, partially in the bag, appears to be a different model with a more traditional shape.

BeCu#9

Bock#8

JOWO#6
